GLOBAL EXPERTS SERVICES
Leading Service Industry

GES

GLOBAL EXPERTS SERVICES

Leading Service Industry

Introduction

Global Experts Services is a leading IT company that offers consultation and delivery in various aspects and projects of IT, Telecom, Technology, Cybersecurity. With a team of highly skilled experts and a wealth of industry experience, we offer a wide range of IT consultation services tailored to meet the unique needs of our clients.

From strategic planning and implementation to ongoing support and optimization, we partner with organizations to drive innovation, enhance efficiency, and maximize their IT investments.

Our Services

01. Project Management Consultation

Successfully executing IT projects requires careful planning, efficient resource allocation, and effective communication. At Global Experts Services, our experienced project managers oversee the entire project lifecycle, ensuring that your IT initiatives are delivered on time, within budget, and with exceptional quality. We employ proven methodologies and best practices to define project scope, develop detailed project plans, manage risks, and allocate resources effectively.

Our project management team provides regular updates, transparent communication, and proactive issue resolution to ensure that projects stay on track. With our expertise in managing diverse IT projects, ranging from software implementations to infrastructure upgrades, we help you achieve project goals, minimize disruptions, and maximize return on investment.

02. CyberSecurity Consultation

At Global Experts Services, our cybersecurity consultation services help organizations safeguard their critical assets and mitigate risks. Our experienced consultants conduct thorough security assessments, develop tailored strategies, and provide expert guidance on industry best practices, compliance, and emerging threats. We assist in implementing security controls, defining incident response plans, and conducting training sessions.

With continuous support, including periodic assessments, we ensure your security measures stay ahead of evolving threats. Partner with us to strengthen your security posture, make informed decisions, and protect your valuable systems, networks, and data. Trust Global Experts Services to navigate the complex cybersecurity landscape effectively.

03. Governance, Risk, and Compliance (GRC) Consultation

Global Experts Services recognizes the significance of effective Governance, Risk, and Compliance (GRC) practices in today's business landscape. Our GRC service offers comprehensive solutions to help organizations establish robust frameworks that ensure ethical operations, mitigate risks, and comply with regulatory requirements.

We assist businesses in developing governance structures that promote transparency, accountability, and informed decision-making. Our consultants evaluate existing governance practices, identify gaps, and design tailored frameworks. We help establish governance policies, define roles and responsibilities, and implement effective board and committee structures.

Moreover, our risk management solutions enable organizations to proactively identify, assess, and mitigate risks. We conduct comprehensive risk assessments, develop risk management frameworks, and assist in implementing risk mitigation strategies.

We offer IT Governance Assessment and Implementation services based on:

- COBIT 2019
- SAMA IT Governance Framework

We also offer:

- IT Governance Training
- ISO / IEC 38500: 2015
- ISO / IEC 31000: 2018

04. IT Strategy and Planning

At Global Experts Services, we understand the critical role of IT in driving business success. Our IT strategy and planning service helps businesses develop comprehensive roadmaps for technology implementation and evolution. We collaborate closely with your team to gain a deep understanding of your business objectives, challenges, and industry landscape. Our experienced consultants assess your existing IT systems, identify areas for improvement, and develop strategic plans that align technology initiatives with your overall business goals. By leveraging our expertise and industry best practices, we enable you to make informed decisions about technology investments, maximize operational efficiency, and gain a competitive edge.

Our advisors will review the current approach for IT strategic planning, review previous strategic plans if any, and ensure the development of a strategic plan in alignment with client business strategic plan. The development of the strategic plan will consist of 3 main phases:

- Strategic Analysis (SWOT and/or PESTEL Analysis)
- Strategic Direction (Vision, mission, values, initiatives, Strategic directions)
- Implementation (list of projects based on the strategic direction with CSFs and KPIs)

Our IT has a team of professionals that can support your IT executive to:

- Design and Build IT Strategies
- Review and Update Existing IT Strategies

05. IT Service Catalog

Centralize detailed information about active IT services through an IT service catalog. This serves as a reference for help desk tickets, offering a self-service storefront for end users and IT technicians. Our visually appealing catalog provides rich features for streamlined request management and quick resolutions.

Check how can ITSM helps connect IT professionals of your organization with the end users who utilize IT services. It offers numerous benefits, including:

Enhanced Agility

ITSM enables businesses to quickly adapt to changes and innovations, maximizing market opportunities and avoiding disruptions to day-to-day operations.

Standardization & Streamlining

ITSM tools facilitate the standardization of IT procedures within the organization, improving synchronization among different departments and enhancing overall efficiency.

Maximizing ROI

By improving employee productivity and responsiveness to market changes, ITSM helps maximize return on investment and enhances the overall customer experience.

Visualized Workflow

Visualizing workflow processes provides insights into bottlenecks and enables effective troubleshooting, leading to the delivery of distinctive services.

Service Catalog Advantage

A service catalog facilitates communication and issue resolution between end users and IT specialists, ensuring compliance, streamlined communication, standardized service delivery, and expanded capabilities.

Assured Compliance

A service catalog serves as a centralized platform for administering and controlling the availability, configurations, and access permissions of IT services.

Streamlined Communication

A well-built service catalog minimizes back-and-forth communication, speeds up onboarding processes, and reduces service desk inquiries.

Standardized Service Delivery

The service catalog allows for the association of parameters with services, enabling standardized service delivery across the organization.

Expansive Capabilities

Integrating the service catalog with a self-service portal expands the scope of self-service and knowledge sharing, providing a single platform for IT-related requests and effective incident management.

06. Information Security

At GES, we specialize in comprehensive Information Security solutions to protect your valuable digital assets. Our expert team ensures the confidentiality, integrity, and availability of your critical information. We offer services such as vulnerability assessments, penetration testing, security audits, and incident response planning. With industry best practices and advanced technology, we tailor strategies to mitigate risks and implement robust security measures. Our proactive approach prevents breaches, while rapid response services minimize the impact of security incidents.

Tailored to the size and nature of your business, Our IT offers a range of services to protect your organization from evolving security threats. Our team assesses your specific objectives and business operations to identify the services you need.

Gap Assessment & Auditing

Leverage our team's expertise to conduct comprehensive audits and assessments of your network, compliance, and security posture. We provide cybersecurity audits, network security audits, web security testing, and more. Our assessments are customized to cover performance, compliance management, network audit and analysis, IT environment analysis, and risk analysis.

ISMS Implementation & Certification - ISO 27001

Align with industry best practices for information security management by implementing an Information Security Management System (ISMS). Our IT team assists in implementing, operating, monitoring, and reviewing ISMS to meet ISO 27001 certification requirements.

NCA & CCC Compliance

Partner with our Saudi team to ensure compliance with the National Cybersecurity Authority (NCA) and Critical Systems Cybersecurity Controls (CCC) requirements. We help national organizations meet the minimum cybersecurity requisites for critical systems.

Governance and Risk Management

Integrate governance and risk management functions into every department of your organization to establish a comprehensive system of rules, practices, and standards. Identify and mitigate potential risks, ensuring that your processes and procedures comply with legal and ethical standards.

07. Business Continuity Management

Our consultants specialize in providing comprehensive Business Continuity Management (BCM) solutions. Our expert team helps organizations prepare for and recover from potential disruptions, ensuring the continuity of critical operations. We offer services such as business impact analysis, risk assessment, continuity planning, and regular testing. By implementing industry best practices and leveraging innovative technologies, we establish resilient systems and processes, including data backup, disaster recovery, and crisis management strategies.

The benefits of having great business continuity management include:

Rapid Response and Recovery:

Having a well-defined action plan in the face of cyberattacks or natural disasters enables you to swiftly respond and recover. This ensures the continuity of operations and sustained customer services and support.

Cost Reduction through Risk Mitigation:

Identify potential risks that could significantly impact your IT operations. By ensuring the sustainability of your IT infrastructure, you streamline business operations and minimize costs associated with disruptions. In the event of a disaster, having the right tools and strategies in place reduces the financial impact and increases your organization's ability to survive.

Cost Reduction through Risk Mitigation:

Implementing business continuity management demonstrates compliance with legal and regulatory mandates. By meeting these requirements, you protect your organization from penalties due to non-conformities, ensuring peace of mind and adherence to legal standards.

Enhanced Resilience:

Effectively responding to incidents, market changes, and innovations enhances the flexibility and resilience of your IT ecosystem. With the ability to adapt quickly to new products or services and anticipate unforeseen challenges, you establish strong risk management practices and maintain a proactive stance.

Positive Reputation:

A robust business continuity management system instills trust among customers, shareholders, and suppliers. It demonstrates your commitment to ongoing business efforts and sends a message that you will be there to provide assistance when needed. This builds confidence and fosters a positive reputation within your industry.

08. Infrastructure Design and Optimization

Building a robust and scalable IT infrastructure is essential for business growth and agility. At Global Experts Services, we specialize in designing and optimizing IT infrastructures that align with your organization's needs. Our skilled consultants conduct a thorough assessment of your current infrastructure, taking into account factors such as performance, security, scalability, and cost-efficiency.

Based on our findings, we develop customized solutions that enhance network architecture, data storage and retrieval, server management, and overall IT system reliability. By leveraging the latest technologies and best practices, we ensure that your IT infrastructure supports your business operations seamlessly, enabling you to focus on core activities and achieve your strategic objectives.

09. Data Management Consultation

In today's data-driven world, effective data management is paramount to maintaining data integrity, accessibility, and security. At Global Experts Services, our data management consultation service helps businesses ensure that their data is managed efficiently and in line with industry best practices. Our expert consultants collaborate with your team to assess your existing data management processes and identify areas for improvement.

We assist in designing data governance frameworks, establishing data quality standards, and implementing data lifecycle management strategies. By leveraging our expertise, organizations can optimize data storage, retrieval, and security, enabling them to make informed decisions and derive valuable insights from their data.

10. Cloud Strategy and Adoption

Embracing cloud technology is a pivotal aspect of modernizing your IT infrastructure and driving digital transformation. At Global Experts Services, our Cloud Strategy and Adoption service offers comprehensive consulting to help businesses harness the power of cloud computing. Our experienced consultants collaborate with your organization to assess your current IT landscape, identify cloud readiness, and develop a tailored cloud strategy aligned with your business objectives.

We analyze your workloads, applications, and data requirements to recommend the most suitable cloud deployment models (public, private, hybrid) and cloud service providers. With our expertise in cloud architecture design, migration planning, and cost optimization, we help you seamlessly transition to the cloud, unlocking the agility, scalability, and cost-efficiency benefits it offers.

11. Digital Transformation

GES Group offers market-leading network solutions and security services to organizations of all sizes. Our comprehensive product and service offerings empower clients with improved communications and insights, leading to significant operational cost savings. With Global Experts Services, you can benefit from our expertise in enterprise network convergence, covering the full spectrum of your network infrastructure needs, **including:**

- Transmission & Optical Network Solutions
- Security Solution Security Assessment & Services
- Video Conference, Digital Signagem & IPTV
- Network Integration & Deployment Services
- Network Strategy & Optimization Services
- Converged Communications Services
- High Speed Network
- Network Health Check
- Network Managed Services

At GES Group, our network solutions promise extends beyond the mere construction of our customers' infrastructure. We go the extra mile to offer a comprehensive peace of mind, assuring you of uninterrupted business operations, robust security, and long-term data durability. With our expertise, your network infrastructure is meticulously designed to deliver the utmost reliability, ensuring your business can thrive with confidence.

12. Data Centers

GES is the leading provider of full-spectrum lifecycle services for data centre owners, occupiers, and investors. Our comprehensive offerings include consulting services, advisory and transaction services, project management, and integrated data center operations.

We provide a turnkey data center solution that encompasses everything from design and implementation to consultation, audit, validation of existing data centers, building, commissioning, DC health check visits, and preventive maintenance of critical facilities.

Our Full-Service Data Offering includes:

Consulting

Our tools and resources enable our clients to make the best technology decisions.

Project Management

We represent our clients to ensure the most complex projects are delivered on time, and well below budget.

Advisory & Transaction Services

We provide our clients with analysis, market intelligence, and execution/procurement capabilities.

Integrated DC Operation

We perform operations, maintenance, and IT services through our globally consistent risk management processes.

One of the key advantages of our turnkey data center design is its future expandability, seamlessly accommodating growth with zero downtime. Our design ensures high efficiency, high-density capacity, and full compliance with international standards such as TIA-942-B and UPTIME Institute.

“

Our data center solution is designed to have a small footprint, affordability, and maximized density, all while minimizing the life cycle and operational costs.

Our dedicated team of experts offers services such as data center health checks and real-time measurements on-site, allowing us to assess and improve various aspects of the facility. We employ manual measurement instruments to evaluate physical quantities, enabling us to provide detailed recommendations for enhancements.

Additionally, we conduct thermal scanning analysis of data center facilities with a high level of accuracy using advanced measurement tools.

Other services offered with the data center include:

- Market research and analysis
- Global, national, and local market infrastructure analysis
- Colocation, cloud and managed services negotiation and analysis
- Telecom, interconnectivity, and carrier hotels
- Modular, enterprise, powered-shell, retrofit, ground-up, and greenfield projects.
- Financial modelling
- Transaction management
- Service Level Agreement ("SLA") negotiation
- Contract structuring, negotiation and analysis
- Fiber and connectivity analysis
- Power capacity and cost analysis
- Data center modernization
- Data center migration

We also offer Oracle-Engineered Systems. By harnessing the power of Oracle technology and leveraging the expertise of our consultants, we offer Oracle Engineered Systems that elevate infrastructure optimization to new heights. As a trusted partner of Oracle, we assist our clients in simplifying the management of on-premise databases, eliminating complexities and reducing costs. Our focus is on optimizing performance and facilitating accelerated return on investment (ROI) for our clients.

- Exadata
- ODA
- ZDLRA
- Supercluster
- Minicluster
- Exadata Cloud@Customer

13. Data Management

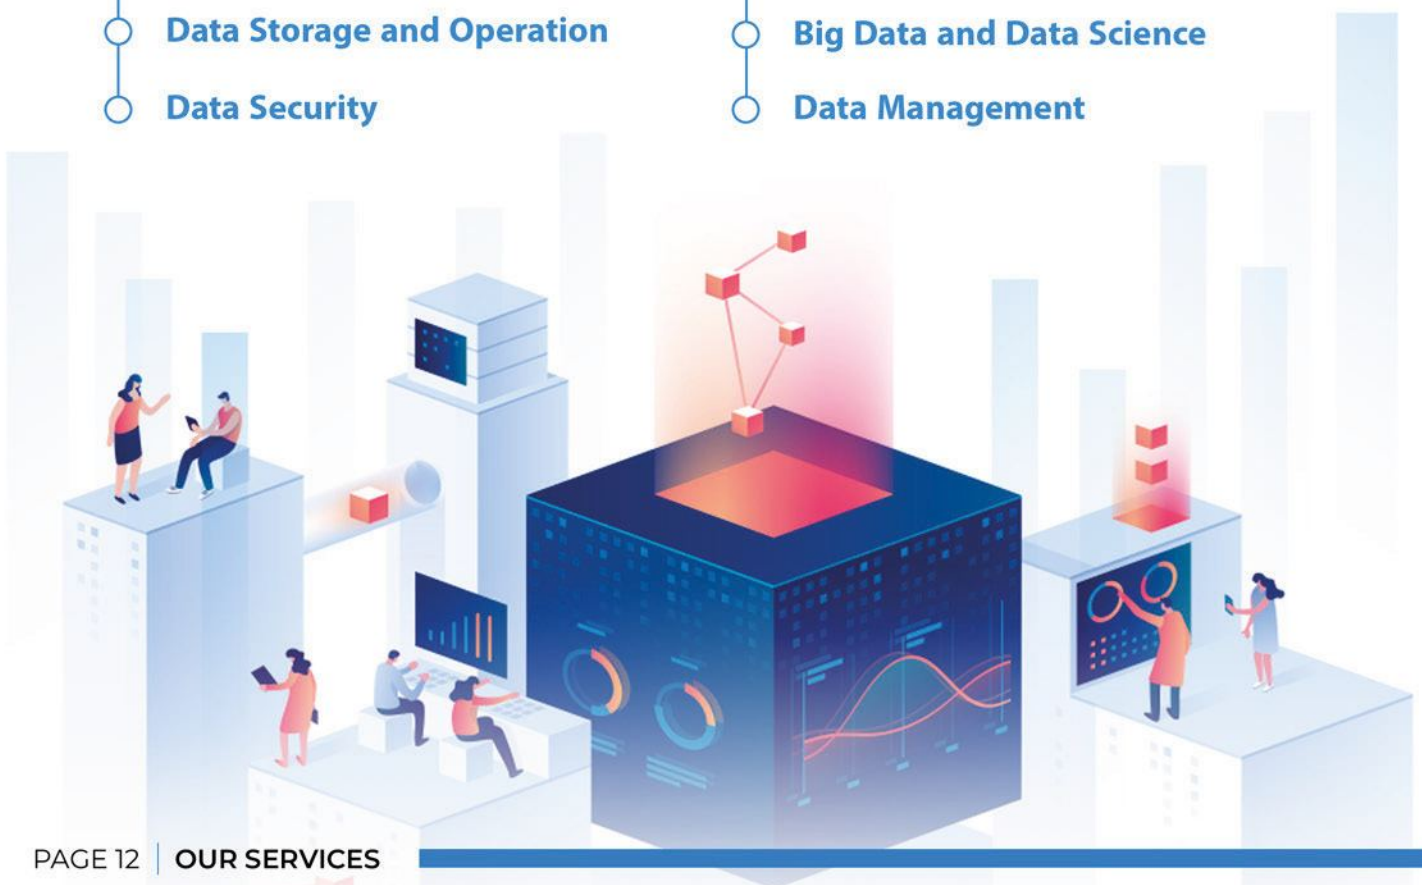

GES specializes in comprehensive Data Management solutions that unlock the power of data for organizations. With expertise in data governance, integration, quality, and analytics, we optimize data assets to drive informed decision-making and achieve impactful outcomes.

Our tailored strategies ensure accurate, consistent, and accessible data, while advanced techniques break down silos for a unified view. Through robust data quality processes and governance frameworks, we promote reliability, integrity, and compliance. Leveraging cutting-edge analytics technologies, we uncover insights, patterns, and trends to empower data-driven growth. Partner with us to transform your data into a strategic asset and fuel success in the digital age.

Our consultants can help you establish your Data Management as per DAMA BOK and SADAIA NDMO frameworks. The services include but are not limited to:

- Data Governance
- Data Architecture
- Data Modelling and Design
- Data Storage and Operation
- Data Security

- Data Integration
- Data Warehousing and BI
- Data Quality
- Big Data and Data Science
- Data Management

14. Enterprise Architecture

GES delivers comprehensive Enterprise Architecture solutions that drive organizational efficiency and innovation. Our strategic planning and technology integration expertise align business objectives with technology capabilities. With a focus on scalability and agility, we design and implement architectures that optimize operations and foster innovation. *Leveraging emerging technologies*, we empower businesses to adapt quickly to changing market dynamics and gain a competitive edge. Partner with us to build a robust foundation for success in the digital era.

We ensure that the IT strategic plan will be designed, built, and implemented as per the internationally accepted best practices, such as TOGAF 9 and NORA frameworks.

The main deliverable is of this service is the updated client EA and EA reference model. The plan will include the current situation of the IT department and the desired situation.

To establish a successful Enterprise Architecture, our consultants prioritize the following:

- *Engaging and involving* the client to foster commitment.
- *Implementing strategies* to make the client's architecture capability function effectively.
- Ensuring the client possesses the right architecture *capability*.
- Maintaining *a continuous and smooth-running process*

15. Infrastructure & Electromechanical

At GES, we uphold our business promises through transparency, reliability, and a focus on results. Adhering to the highest international standards, we prioritize quality, timely delivery, and fair pricing.

With these core values, GES develops comprehensive end-to-end solutions, enabling customers to transition to an On-Demand environment. By addressing operational efficiency and business resiliency, we cater to the evolving needs of our customers and facilitate their entry into the On-Demand Business realm.

For our commercial clients, we offer programmed maintenance schedules that eliminate the guesswork associated with budgeting, scheduling, and completing routine electrical systems maintenance. Our emergency response technicians are available 24/7, 365 days a year, ensuring prompt support whenever it's needed.

Our suite of maintenance and installation services to the commercial sector encompasses:

- Electrical Design and Construction
- Switchboard and Metering Alterations
- Uninterrupted Power Supply (UPS)
- Energy Management Systems & Power Audits
- Light and Power Installation
- Exit Emergency Lighting
- 24.7 Maintenance and Servicing
- Standby Generators

Maintenance and installation services provided to heavy industry projects include:

- Electrical and Instrumentation Works
- Underground Cabling
- Lightning Protection
- Installation of Switchgear and Control Systems
- Installation of Switch Rooms and MCC's
- Assembly of Modular Units and Skids
- Surge / Overvoltage Protection
- Conveyors and Materials Handling Systems

We also offer maintenance, modifications, and operation support services including:

- Sustaining Capital Projects
- Asset Remediation Works
- Brown Field Tie-Ins
- Shutdown Planning and Execution
- Pre-Commissioning, Commissioning, and Completions

16. Project Management

Global Experts Services adheres to stringent project management guidelines and methodologies when executing all of our projects. Project management involves the application of knowledge, skills, tools, and techniques to meet project requirements.

To ensure the successful delivery of our customers' projects, we have established a dedicated Project Management team. This team is entrusted with the responsibility of completing projects on time, within budget, and to the utmost satisfaction of our customers.

GES comprises accomplished leaders and visionaries in the field of project management, bringing extensive expertise and experience to every project we undertake.

17. Telecommunication

Our primary focus is to provide exceptional support to our telecommunications clients. With a highly skilled and well-equipped multinational team, we are committed to delivering cutting-edge communication services.

We execute projects in strict accordance with the highest quality standards, ensuring cost-effectiveness throughout the process. Our unwavering commitment and professionalism drive us towards targeted solutions that meet our clients' specific needs.

Global Experts Services possesses core competencies in various areas, including switching, transmission systems, cellular services, rural telecommunication, Optical Fiber Laying (*OSP*), Fiber To The Home (*FTTH*), construction of long-distance networks, transmission systems, IT and networking solutions, *GSM 2G, 3G, 4G* networks, *WIMAX, LTE, IoT G5* technology, and more.

Our Major Operational Areas include:

- Switching Systems
- Surveys
- Traffic Studies
- Supply & Installations
- Testing Commissioning
- Building Transmission Systems
- Outside Plant Network and Inside Plant Network
- Operation & Maintenance of the Electronic and Digital Exchanges

Design, Supply, and Execution of:

- Fiber to the Home (FTTH)
- Network Survey
- Site Acquisition
- Site Survey
- Property Classification
- Installation Engineering
- Digitized Mapping
- Radio and Network Planning
- Commissioning and Integration
- Feeder, Antenna, RBS, & Shelter Supply Installations
- Access Network (Copper/OFC) Wireless Communication
- Long Distance Optical Fiber Cable Network

18. Physical Security

Global Experts Services offers clients a sense of peace and security. Our secure facility complex ensures that your employees, visitors, guests, and partners can fully focus on what matters most: their business, productivity, and enjoyment of their activities.

We take care of the details by working closely with our clients to understand their specific security requirements. This includes designing systems, determining equipment placement, and considering environmental and aesthetic impacts. Understanding potential threats is crucial in the development of advanced security systems.

To achieve this, we engage in the following activities:

- Assessing potential threats
- Analyzing vulnerabilities
- Designing security systems to mitigate risks
- Planning and implementing operational security measures
- Conducting risk assessments and creating plans to manage identified risks

Our range of products includes:

Predictive Systems:

- Biometric Identification
- CCTV Systems Observation system and Analytic Behaviours
- Fire Alarm Systems FA
- Intrusion Systems
- Radar Systems
- Inspection Systems
- Metal Detector
- Mobility Surveillance
- Perimeter Fence
- Surveillance Systems (Drones)
- Spectrum Analyser Systems
- Nonlinear – Inspection systems

Protective Systems:

- Command Security Centre
- Emergency Evocation Systems
- Public Address Systems
- Secure Telecommunication (UHF – VHF, Satellite Communicating, Tetra.)

Preventive Systems:

- Gate Barrier Road Blockers
- Jamming Systems
- Stain Steels Gates
- Sliding Gates
- Access Control
- Fight Fighting Systems
- Smart Controls Systems

19. Cloud Services

At Global Experts Services, we understand the evolving demands of the digital landscape and the need for flexible and reliable cloud solutions. With our comprehensive suite of cloud services, we empower organizations to harness the full potential of cloud computing, enabling enhanced collaboration, increased efficiency, and secure data management.

From cloud infrastructure deployment to data migration and optimization, our expert team is dedicated to delivering tailored solutions that meet your unique business requirements. Experience the agility, accessibility, and cost-effectiveness of cloud computing with Global Experts Services as your trusted cloud services provider.

20. Cloud Consulting

Cloud Cost Optimization

Optimize your cloud expenses and maximize ROI with our expert Cloud Cost Optimization services. We analyze your usage, identify cost-saving opportunities, and implement strategies for efficient resource allocation. Benefit from right-sizing, pricing optimization, and automation to minimize expenses without compromising performance. Achieve cost-effective scalability while aligning with your budgetary needs.

Cloud Assessment

Our Cloud Assessment services provide a comprehensive evaluation of your existing cloud infrastructure, identifying areas for optimization and cost savings. Through a detailed analysis of your cloud environment, we assess resource utilization, performance, and cost efficiency. Our expert team will provide actionable recommendations to optimize your cloud resources, ensuring maximum return on investment while maintaining optimal performance.

Digital Transformation

Embrace the potential of digital transformation with our specialized services designed to help businesses leverage cloud technologies for growth and innovation. We work closely with you to understand your unique business objectives and develop a tailor-made digital transformation strategy. From cloud migration to application modernization, our team guides you through the entire process, enabling you to embrace the power of the cloud and drive meaningful business outcomes.

Converged & Hyper-Converged Infrastructure

Embrace the potential of digital transformation with our specialized services designed to help businesses leverage cloud technologies for growth and innovation. We work closely with you to understand your unique business objectives and develop a tailor-made digital transformation strategy. From cloud migration to application modernization, our team guides you through the entire process, enabling you to embrace the power of the cloud and drive meaningful business outcomes.

Software-Defined Data Centres (SDDC)

Embrace the potential of digital transformation with our specialized services designed to help businesses leverage cloud technologies for growth and innovation. We work closely with you to understand your unique business objectives and develop a tailor-made digital transformation strategy. From cloud migration to application modernization, our team guides you through the entire process, enabling you to embrace the power of the cloud and drive meaningful business outcomes.

Virtualization

Maximize the utilization of your hardware resources through virtualization. Our virtualization solutions enable you to consolidate servers, reduce hardware costs, and enhance workload flexibility. We leverage industry-leading virtualization technologies to optimize your infrastructure, improve scalability, and simplify management. Whether it's server virtualization or desktop virtualization, our experts ensure seamless implementation and ongoing support.

IaaS & SaaS Solutions

Leverage the benefits of Infrastructure-as-a-Service (IaaS) and Software-as-a-Service (SaaS) solutions tailored to your business needs. Our team assists in selecting, deploying, and managing IaaS and SaaS platforms that provide scalable infrastructure and ready-to-use software applications. By shifting to cloud-based services, you can reduce capital expenses, streamline operations, and enhance productivity, while we handle the infrastructure and software management.

DevOps Consulting

Accelerate your software development and delivery processes with our DevOps consulting services. Our experts collaborate with your team to streamline workflows, automate processes, and foster a culture of continuous integration and delivery. By implementing DevOps practices, you can achieve faster time-to-market, improved quality, and increased efficiency in software development. Our tailored solutions enable seamless collaboration between development and operations teams, ultimately driving business growth and innovation.

21. Cloud Migration & Modernization

Infrastructure Modernization

Our Infrastructure Modernization services enable businesses to transform their existing infrastructure into a modern, cloud-native environment. We assess your current infrastructure, identify areas for improvement, and develop a comprehensive modernization strategy. Leveraging industry-leading cloud technologies, we migrate your infrastructure to the cloud, enabling scalability, agility, and enhanced performance. Experience the benefits of a modernized infrastructure that aligns with your business objectives and drives digital innovation.

Platform Migration

Streamline your operations and enhance scalability with our Platform Migration services. We specialize in migrating your existing applications and workloads to leading cloud platforms such as AWS, Azure, GCP, and more. Our team analyzes your application architecture, plans the migration process, and executes the migration with minimal downtime. Benefit from the flexibility, scalability, and cost-efficiency of cloud platforms while ensuring a seamless transition of your applications.

Application Migration

Expand your business capabilities by migrating your applications across various cloud solutions such as AWS, Azure, GCP, and more. Our experts understand the intricacies of each cloud platform and provide seamless application migration services. We analyze your application requirements, plan the migration strategy, and execute the migration process with precision. Unlock the benefits of different cloud solutions while ensuring compatibility, scalability, and optimal performance for your applications.

Database Migration

Our Database Migration services facilitate the smooth and secure migration of your databases to the cloud. We analyze your database infrastructure, evaluate compatibility with the target cloud platform, and design a migration plan tailored to your specific requirements. Our experts handle the migration process, ensuring data integrity, minimal downtime, and optimized performance. Leverage the power of cloud databases while minimizing disruption and maximizing efficiency.

Cloud Server Migration

Simplify your server migration process with our Cloud Server Migration services. We assist in migrating your servers and applications from on-premises or traditional hosting environments to the cloud. Our team ensures a seamless transition, minimizing downtime and ensuring data integrity. Benefit from the scalability, reliability, and cost-effectiveness of cloud servers while maintaining the performance and availability of your applications.

21. Cloud Managed Services

Cloud Deployment

Our Cloud Deployment services ensure a seamless and efficient transition to the cloud. We handle the entire deployment process, from initial planning to implementation, ensuring a well-architected and optimized cloud environment. Our experts leverage industry best practices to deploy your applications and workloads, ensuring scalability, performance, and security. Experience a hassle-free migration to the cloud and leverage the full potential of cloud technologies.

Cloud Security

Protect your cloud infrastructure and data with our comprehensive Cloud Security services. We implement robust security measures to safeguard your cloud environment from threats and vulnerabilities. Our experts conduct thorough security assessments, design and implement security controls, monitor for potential risks, and respond to security incidents promptly. Rest assured that your cloud infrastructure is protected by industry-leading security practices and technologies.

Infrastructure Set up

Leverage our expertise in Infrastructure Set up to build a robust and scalable cloud infrastructure. We assist in designing and implementing the foundational components of your cloud environment, such as virtual machines, storage, networking, and security. Our experts ensure optimal configuration and performance tuning, enabling you to leverage the full potential of your cloud infrastructure. Experience a well-structured and reliable cloud infrastructure that supports your business goals.

Network & Storage

Optimize your network and storage infrastructure with our Network & Storage services. We design and implement scalable and reliable network architectures, ensuring seamless connectivity and high-performance data transfer within your cloud environment. Our experts leverage advanced storage technologies to optimize data storage and retrieval, ensuring efficient utilization of resources and enhanced data availability.

Backup & Disaster Recovery

Mitigate the risk of data loss and ensure business continuity with our Backup & Disaster Recovery services. We develop tailored backup and recovery strategies to protect your critical data and applications in the cloud. Our experts implement automated backup solutions, perform regular backups, and design robust disaster recovery plans. Experience peace of mind knowing that your data is secure, backed up, and recoverable in the event of a disaster.

22. Outsourcing and Managed Services

In today's digital landscape, organizations rely heavily on IT infrastructure and cybersecurity to ensure smooth operations and protect sensitive data. Outsourcing and managed services in the realm of IT and cybersecurity have become essential for businesses to effectively manage their technology needs and mitigate potential risks.

At Global Experts Services, we specialize in offering comprehensive IT and cybersecurity outsourcing and managed services to help businesses stay ahead in this rapidly evolving digital landscape. Our expert team serves as an extension of your organization, providing the necessary expertise and support to handle critical IT functions and safeguard your digital assets.

From IT infrastructure management to backups and maintenance, our services cover the entire spectrum of IT operations. We take care of monitoring and maintaining your IT infrastructure, ensuring optimal performance, high availability, and scalability. Our experienced professionals handle tasks such as server administration, network management, and more, allowing you to focus on core business activities.

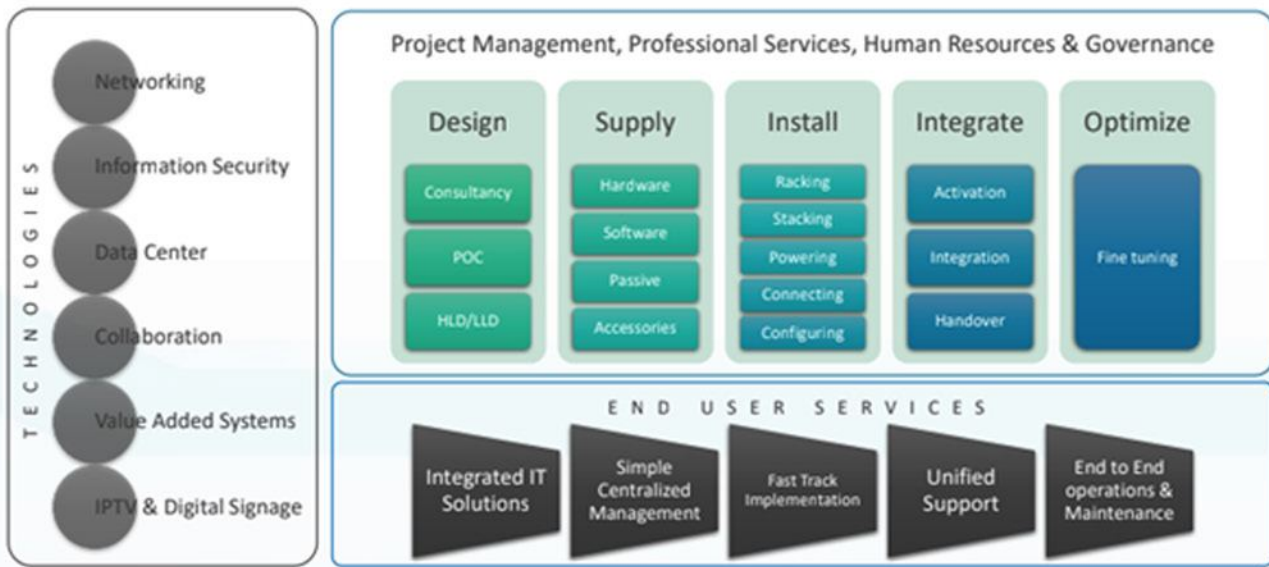

In summary, our IT and cybersecurity outsourcing and managed services provide comprehensive support to organizations, enabling them to optimize their technology infrastructure, enhance operational efficiency, and protect their digital assets from cyber threats. By entrusting these critical functions to our experienced team, you can focus on your core business activities with the peace of mind that your IT and cybersecurity needs are in capable hands.

In the realm of cybersecurity, our managed services play a crucial role in safeguarding your organization against evolving threats and vulnerabilities. We implement robust security measures to protect your networks, systems, and sensitive data. Our experts conduct regular security assessments, design and implement security controls, monitor for potential risks, and respond to security incidents promptly. By outsourcing your cybersecurity needs to us, you can ensure that your organization is well-protected against cyber threats.

Our capabilities encompass a wide spectrum, including:

We cover various solutions and services, which include:

Managed Service Methodology:

23. Backup, Data Protection, and Archiving Solutions

At Global Experts Services, we specialize in delivering cutting-edge solutions for backup, data protection, and archiving needs. With a strong focus on data security and reliability, we empower organizations of all sizes to safeguard their critical information, mitigate risks, and ensure business continuity in an ever-evolving digital landscape.

Our comprehensive suite of backup solutions is designed to address the diverse needs of modern enterprises. Leveraging the latest technologies, we offer secure, automated, and scalable backup services that protect your valuable data against loss, corruption, or unauthorized access. Whether it's on-premises, in the cloud, or in hybrid environments, our solutions can seamlessly integrate into your existing infrastructure, providing robust protection for your most critical assets.

Data protection lies at the core of our mission, and we leave no stone unturned in securing your information. Our team of experts works closely with your organization to assess risks, develop tailored strategies, and implement robust data protection measures. From encryption and access controls to disaster recovery planning and incident response, we provide end-to-end solutions that ensure the confidentiality, integrity, and availability of your data, even in the face of unforeseen events.

Archiving plays a vital role in managing the lifecycle of data, complying with regulatory requirements, and optimizing storage resources. Our archiving solutions offer a seamless and efficient means of organizing, storing, and retrieving data, while ensuring its long-term preservation and accessibility. With advanced search capabilities, automated retention policies, and scalable storage options, we enable you to efficiently manage data growth, reduce costs, and meet compliance obligations.

At Global Experts Services, we pride ourselves on our customer-centric approach and commitment to excellence. Our team of skilled professionals is dedicated to providing personalized support and guidance throughout your journey, from solution design and implementation to ongoing maintenance and optimization. We understand that every organization is unique, and we strive to deliver tailored solutions that align with your specific requirements, industry standards, and budgetary considerations.

In a world where data is the lifeblood of business, trust Global Experts Services to be your reliable partner in backup, data protection, and archiving solutions. Together, we can safeguard your critical information, empower your organization, and drive success in the digital era.

24. Robots, IoT, and Artificial Intelligence

Global Experts Services is a leading provider of advanced solutions in the fields of Robots, IoT (Internet of Things), and Artificial Intelligence (AI). With a vision to revolutionize industries and empower businesses with cutting-edge technologies, we offer innovative and customizable solutions that drive efficiency, productivity, and growth in the digital era.

Robots are transforming the way industries operate, and we are at the forefront of this revolution. Our expertise in robotics encompasses a wide range of applications, including industrial automation, collaborative robots (cobots), autonomous vehicles, and unmanned aerial systems. By deploying intelligent and adaptable robots, we help businesses streamline processes, enhance precision, and optimize resource utilization, ultimately boosting operational performance and reducing costs.

IoT has emerged as a game-changer in the realm of connectivity and data intelligence. At Global Experts Services, we leverage the power of IoT to enable seamless communication and interaction between devices, machines, and systems. Our IoT solutions empower organizations to collect, analyze, and leverage real-time data, unlocking valuable insights that drive informed decision-making, predictive maintenance, and enhanced customer experiences. From smart cities to industrial IoT deployments, we deliver end-to-end solutions that bridge the physical and digital realms.

Artificial Intelligence is the backbone of intelligent automation and cognitive computing. Our AI solutions harness the potential of machine learning, natural language processing, and computer vision to automate complex tasks, extract actionable insights, and enable human-like interactions. Whether it's developing AI-driven chatbots, implementing intelligent document processing systems, or creating sophisticated recommendation engines, we empower businesses to unlock the full potential of AI and embrace the benefits of automation, efficiency, and scalability.

At Global Experts Services, we pride ourselves on our deep industry knowledge, technical expertise, and commitment to delivering exceptional results. Our team of global experts works closely with clients to understand their unique challenges, devise tailored strategies, and implement robust technologies that align with their goals and aspirations. We believe in fostering long-term partnerships, and our customer-centric approach ensures that we provide comprehensive support throughout the entire project lifecycle, from concept to implementation and beyond.

Join us on the journey to the future of technology with Global Experts Services. Together, we can unlock the transformative power of Robots, IoT, and Artificial Intelligence, and pave the way for a smarter, more connected, and efficient world.

25. Enterprise Resource Planning (ERP)

By leveraging industry-leading practices, intelligence, and cutting-edge technology, we provide ERP solutions that empower clients to achieve complete control over their businesses, enhance cross-departmental visibility, and streamline operational processes.

We recognize that automation plays a pivotal role in the success of businesses, and the increasing challenges necessitate the need to achieve more with fewer resources. That's why we collaborate closely with our clients to modernize their enterprises, introducing automation and robust controls that drive accelerated return on investment, mitigate disruptions, and eliminate the potential for human errors.

26. Solution Architecture Services and Digital Transformation

Global Experts Services is a trusted provider of cutting-edge Solution Architecture Services and Digital Transformation solutions. With a relentless commitment to innovation and expertise in emerging technologies, we empower businesses to navigate the digital landscape, optimize processes, and achieve sustainable growth in today's rapidly evolving business environment.

Our Solution Architecture Services are tailored to meet the unique challenges and objectives of each client. We understand that a well-designed solution architecture forms the foundation for successful technology implementations. Our team of skilled architects works closely with organizations to assess their current infrastructure, identify areas for improvement, and design robust and scalable solutions that align with business goals. From application architecture to cloud infrastructure design and integration, we provide end-to-end services that optimize performance, enhance security, and enable seamless connectivity.

Digital Transformation is a key driver of success in the modern business landscape. At Global Experts Services, we partner with organizations to unlock their digital potential and drive meaningful change. Our comprehensive suite of digital transformation services encompasses strategy development, process optimization, technology integration, and organizational change management. By leveraging the latest technologies such as cloud computing, data analytics, and artificial intelligence, we help businesses reimagine their operations, enhance customer experiences, and gain a competitive edge in the digital age.

We believe that successful digital transformation requires a holistic approach. Our team of experts collaborates closely with clients to understand their unique business challenges and goals. Through a combination of deep industry knowledge, technical expertise, and a customer-centric mindset, we develop tailored strategies and roadmaps that guide organizations through their digital transformation journey. With a focus on agility, scalability, and sustainability, we enable businesses to adapt to market dynamics, embrace innovation, and unlock new opportunities for growth.

At Global Experts Services, we take pride in our track record of delivering exceptional results and driving tangible business outcomes. Our experienced consultants work closely with clients to ensure seamless execution and implementation of solutions. We prioritize long-term partnerships and provide ongoing support, monitoring, and optimization to maximize the value of our

Join us on the path to digital excellence with Global Experts Services. Together, we can harness the power of Solution Architecture Services and Digital Transformation to future-proof your organization, accelerate innovation, and achieve sustainable growth in the digital era.

27. Cybersecurity Services

Global Experts Services is a leading provider of comprehensive Cybersecurity solutions, dedicated to safeguarding organizations against the ever-evolving threat landscape. With a deep understanding of the complexities and risks associated with cybersecurity, we offer a range of services and solutions designed to protect critical assets, mitigate vulnerabilities, and ensure data confidentiality, integrity, and availability.

Our Cybersecurity services cover a wide spectrum of needs.

Integrated Governance, Risk, and Compliance

As a highly reputable and trusted company in the multiple countries and markets, we offer the best cybersecurity solution for your business. Our track record includes significant achievements in certification services, and we proudly stand as the sole Saudi and Egyptian partner offering Utimaco's HSMs with certified support and maintenance. At GES, we provide competitive and reliable cybersecurity solutions by forging strategic alliances with top IT security vendors and digital security service providers. With a service-oriented approach, our expertise lies in delivering technical security consultancy to businesses of all sizes. We are dedicated to safeguarding your valuable resources through premium security advisory services. Our services extend throughout the MENA region.

We provide a competitive value proposition to:

- GRC Class-A talents
- Credible Regional Consultancy Partners (RGPs)
- On-Demand competitive FTE consumption-based InfoSec services (MSP)
- Compliance with growing regulatory legislations (Governmental/Industrial: CBE regulations, FATCA, GDPR,...)
- Business-sense of accountability & shareholders legal liability
- Intrusion of Cloud

Security Architecture Design and Implementation

We provide end-to-end security architecture design and implementation services, tailored to your organization's specific requirements. Our experts collaborate with you to design robust security frameworks, establish secure access controls, and implement industry best practices to fortify your infrastructure against cyber threats.

Security Incident Response and Management

In the event of a security incident, our incident response team is ready to swiftly and effectively mitigate the impact. We provide 24/7 monitoring, incident detection, and response services to ensure timely containment, investigation, and remediation, minimizing downtime and potential damage to your operations.

Security Awareness Training

We offer comprehensive cybersecurity awareness training programs to educate your employees about the latest threats, best practices, and security protocols. By building a culture of security awareness, we empower your workforce to become the first line of defense against cyber attacks, reducing the likelihood of successful breaches.

Data Protection and Encryption

Protecting sensitive data is of paramount importance. Our data protection and encryption services utilize advanced encryption algorithms and techniques to secure data at rest, in transit, and in use. We help you implement data loss prevention controls, encryption mechanisms, and secure data storage solutions to ensure the confidentiality and integrity of your critical information.

Compliance and Regulatory Support

Staying compliant with industry regulations and standards is crucial for maintaining trust and avoiding penalties. Our experts assist you in navigating complex compliance frameworks and provide guidance on aligning your security practices with regulations such as GDPR, HIPAA, PCI DSS, and more.

Penetration Testing Service

A Penetration Test is conducted to validate the exploitability of identified vulnerabilities using tools commonly employed by modern hackers. It focuses on a subset of vulnerabilities, typically selected from the results of a Vulnerability Assessment (VA) based on their high or critical vulnerability rankings. The aim is to confirm the potential for exploitation rather than exhaustively testing all vulnerabilities.

Vulnerability Assessment Service

A Vulnerability Assessment (VA) is conducted using specialized tools in a non-intrusive manner to identify weaknesses, particularly in sensitive information processing systems such as those found in Data Center resources. The assessment aims to uncover vulnerabilities that could be exploited by malicious entities within the organization.

Compromise Assessment Service

The Compromise Assessment has proven instrumental in assisting numerous organizations in discovering and validating security breaches that may have persisted for extended periods. These breaches have led to the theft of valuable intellectual property, personally identifiable information, payment card details, or other sensitive data.

Security Configuration Review

Many network devices are often configured with a primary focus on business operations rather than security. Conducting a configuration review enables the identification of vulnerabilities in network devices such as routers, switches, firewalls, WLAN controllers, load balancers, and other implemented technologies. By securely configuring these devices, the risk of external attackers traversing through the network is mitigated.

Secure Code Review Service

A secure code review is an examination of application source code conducted as a "white box" testing process. The objective is to analyze the code thoroughly and identify potential security weaknesses and flaws within it. This review involves a combination of scanning tools and manual examination to detect and address security vulnerabilities present in the source code.

Risk Assessment Service

A cybersecurity risk assessment involves the identification of information assets that may be susceptible to cyber-attacks. These assets can include hardware, systems, laptops, customer data, and intellectual property. The assessment then identifies and evaluates the potential risks that could impact these assets, including the likelihood of attacks and their potential consequences.

Operational Technology Cybersecurity

Our Operational Technology (OT) Cybersecurity services include:

- ICS / OT Cyber Security Risk Assessment
- Development of ICS / OT Cyber Security Strategy
- Development of ICS / OT Cyber Security Program
- ICS / OT Cyber Security Program and Project Management
- Development of Customized ICS / OT Cyber Security
- Baseline Standards
- Vulnerability Assessment
- Penetration Testing
- ICS / OT Cyber Security Incident Response Planning and Management
- Compliance Services with Regulatory Requirements for Critical Infrastructure
- Awareness and Training Service

We also offer services which include:

1. Network Security

- Endpoint Protection
- NG Firewall
- Intrusion Detection/Prevention System
- Network Access Control (NAC)
- VPN (SSL, IPSEC, Concentrator)
- Wireless Security
- Database Monitoring, Auditing and Real-Time Protection

2. Digital Forensics

- Enterprise Investigator
- Enterprise Examiner
- Incident Response Analysis
- Information Assurance
- Electronic Discovery of Stored Information
- Data Audit and Policy Enforcement

SOC Maturity Assessment Service

The assessment process involves analysing and determining the maturity levels of assessed capabilities to consistently improve and deliver SOC (Security Operations Center) services across all levels. The SOC maturity model consists of three levels:

- **Level 1:** Building correlation rules
- **Level 2:** Automating responses
- **Level 3:** Integrating service management

3. Identity and Access Management (IAM)

- Single Sign On
- Multifactor Authentication
- Unified Access Control
- Identity Directory
- User Administration & Provisioning
- Workflow Management
- Extended Role Based Access Control (E-RBAC) Workflow Management
- Self-service Password Management (end-user)
- Privileged user & Password management
- Remote Vendor Monitoring (Session Recording)

4. Threat and Vulnerability Management

- Network Vulnerability Management
- Operating System Vulnerability Management
- Applications Vulnerability Management
- Database Vulnerability Management
- Desktop Vulnerability Management

5. Encryption and Key Management

- Encryption for Data at Rest
- Encryption for Data in Transit
- Secure Data Exchange with external business entities

6. SOC Implementation (Including SIEM Solution)

- Real-time threat intelligence & event monitoring
- Insider threat detection and cloud discovery
- Data exfiltration and protection against phishing attacks
- Endpoint detection & response (EDR)
- Automated security investigation
- Incident forensics (Network scans to identify anomalous communications)
- Detect abnormal connection behavior (volume/time/geographic)
- Detect rogue services and systems, Malware/ Worm propagation, etc.
- DNS Attack (detect outbound requests to malicious sites, identify DNS trends and certificates)

7. Managed Security Services (MSS)

- Asset Discovery – Automatically inventories critical assets.
- Vulnerability Assessment – Detects which assets are vulnerable.
- Intrusion Detection – Identifies targeted hosts and active threats.
- Behavioural Monitoring – Identifies changes in normal operating conditions.
- Managed SIEM Service
- Managed Security Devices

8. Information Rights Management

- Digital Rights Management and Control
- Document Signing

9. Security Compliance Service for IT

- NCA, ISO 27K, NIST CSF, NERC, GDPR, Saudi PDPL

27.

Security Architecture Design and Implementation

Establishing a robust cybersecurity program poses difficulties for organizations of various sizes. Our team of skilled consultants possesses extensive knowledge in global and local cybersecurity regulations, as well as expertise in managing a diverse array of cyber risks prevalent in today's business landscape. We are committed to assisting you in implementing optimal security practices and solutions that align with your budget and specific requirements.

We deliver strategic, executive and tactical recommendations, along with an implementation roadmap, to meet your organization's desired cybersecurity state. We offer CyberSecurity program assessment for:

- ISO 27001
- PCI-DSS
- NIST 800-37
- NIST CSF
- And more

We also offer a service titled "CISO as a Service". Organizations that already have a security manager in place may require the assistance and mentorship of a seasoned expert to strengthen their cybersecurity program and enhance security compliance. Partnering with GES CISO allows you to access the extensive experience and expertise of our certified Chief Information Security Officers (CISOs). This service enables businesses to achieve a high level of security without the need for a full-time, in-house CISO, offering flexible service options ranging from 4 days a month to 5 days a week.

● Compliance Services

PCI-DSS

Assessment includes review of the cardholder environment and production network (including vulnerability and penetration testing) and supporting technical documentation, & stakeholders' interviews.

We also provide PCI-DSS Compliance Support Service which is designed carefully to provide further support and meet your requirements.

ISO/IEC 27001:2013

With ISO/IEC 27001:2013 certification you can show to existing and potential customers, suppliers and shareholders the integrity of your data and systems and your commitment to information security. Our experts can help you comply with the ISO/IEC 27001:2013 standard efficiently and cost effectively.

Regulatory Compliance

Conduct compliance gap assessment against all local regulatory compliance frameworks, such as NCA Essential Cybersecurity Controls, NCA Critical Systems Cybersecurity Controls, SAMA Cybersecurity Framework, CITC, etc.

We also provide Regulatory Compliance Support Service which is designed carefully to provide further support and meet your needs.

● Risk Management Service

We offer various Risk Management services, including:

● Cybersecurity Risk Management

Conduct a comprehensive evaluation of risks spanning business functions, services, and IT assets. We are here to assist you in effectively addressing these risks through prioritization, considering compensating controls, and conducting cost-benefit analysis. Furthermore, we will develop a practical risk register and deliver detailed technical and executive reports, supported by dashboards that measure key performance indicators (KPIs) and key risk indicators (KRIs).

● Third Party Risk Management

Creating and managing a third-party cybersecurity risk management (TPCRM) program can require significant resources. At GES, our team of experienced consultants is ready to assist you in developing a robust framework for third-party cybersecurity risk management. We offer a comprehensive range of services and solutions that empower organizations to operate efficiently while effectively mitigating third-party cybersecurity risks. With our expertise, you can enhance your ability to manage and mitigate risks associated with third-party relationships.

● Privacy & Data Protection

Organizations often have a security manager in place who would benefit from the guidance and support of a seasoned expert to enhance their cybersecurity program and ensure compliance. Collaborating with GES CISO provides access to our highly experienced and certified Chief Information Security Officers (CISOs). This service allows businesses to achieve a strong security posture without the expense of hiring a full-time, in-house CISO. We offer flexible service options ranging from 4 days a month to 5 days a week, enabling organizations to leverage the expertise of our CISOs as needed.

Cybersecurity Managed Services

GES introduces a new offering called Governance, Risk, and Compliance as a Service, tailored to help our customers reduce the operational costs associated with GRC while establishing a mature GRC department aligned with their business strategy and objectives. GRC as a Service is a distinctive offering that enables our customers to take advantage of the expertise and training of our GRC consultants. They will implement, enhance, and manage your GRC environment, ensuring optimal performance and alignment with your organization's goals.

Our SOC-as-a-Service (Security Operations Centre) delivers cutting-edge managed threat detection and incident response solutions to safeguard your business against evolving cyber threats. We not only prioritize regulatory compliance but also strive to minimize the expenses associated with managing and operating the Security Operations Centre. With our innovative approach, you can effectively protect your organization while optimizing resource allocation and cost management.

Cybersecurity Benchmarking

At Global Experts Services, we prioritize staying ahead of the evolving threat landscape and leveraging the latest cybersecurity technologies and practices. Our team of seasoned professionals brings deep expertise and a customer-centric approach to every engagement, ensuring robust protection for your organization's digital assets and enabling you to focus on your core business objectives.

Trust Global Experts Services as your cybersecurity partner, and together we can fortify your defences, mitigate risks, and safeguard your organization against the ever-present cybersecurity threats.

28. Middleware and Identity Management

In collaboration with Oracle, we offer a wide range of middleware and identity management solutions and services designed to enable the seamless development, implementation, and management of service-oriented architecture (SOA).

Our middleware solutions are geared towards optimizing and simplifying application development processes, allowing for smooth integration of various systems and applications within your organization, regardless of their diverse manufacturers or development technologies.

Additionally, our team of experts in middleware and identity management assists clients in effectively managing and controlling the identity lifecycle of their personnel. We also establish and govern the authentication, authorization, and security framework for enterprise applications, ensuring robust security measures are in place across the organization.
